Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Within all independent claims, within the entirety of each claim, the examiner deems the novel limitation to be the attempting to reconnect the failed socket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comment

In the examination of this case, the use of "socket" within the claims has been interpreted by the examiner, in view of the overwhelming evidence found in the specification, as referring to network sockets and not physical sockets.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Specifically, Sheh ('752), Chae ('700), Lyer ('179), and Hanning ('174) teach socket failover, Burns ('124) teaches socket failover with MAC address shifting, and Herbert ('186) teaches connection monitoring and failover using multiple network cards at a node.
